

THREAT ADVISORY

HelloKitty is launching a DDoS attack by exploiting known vulnerabilities

TA202146

Threat Level

Red

Publish Date – Nov 2, 2021

The FBI has issued a warning to private businesses about a new feature of the HelloKitty ransomware group (aka FiveHands). The Hello Kitty/FiveHands actor (UNC2447) employs the double extortion strategy to place undue pressure on victims. If the victim fails to respond quickly or pay the ransom, the threat actors may launch a Distributed Denial of Service (DDoS) attack on the target company's public website. HelloKitty achieves first access by exploiting known SonicWall flaws (CVE-2021-20016, CVE-2021-20021, CVE-2021-20022, CVE-2021-20023). Patches for these vulnerabilities are widely accessible.
