**ATTACK
REPORT**

Lazarus deploys new attack tool, MagicRAT to
target organizations worldwide

Date of Publication

September 8, 2022

Admiralty code

A2

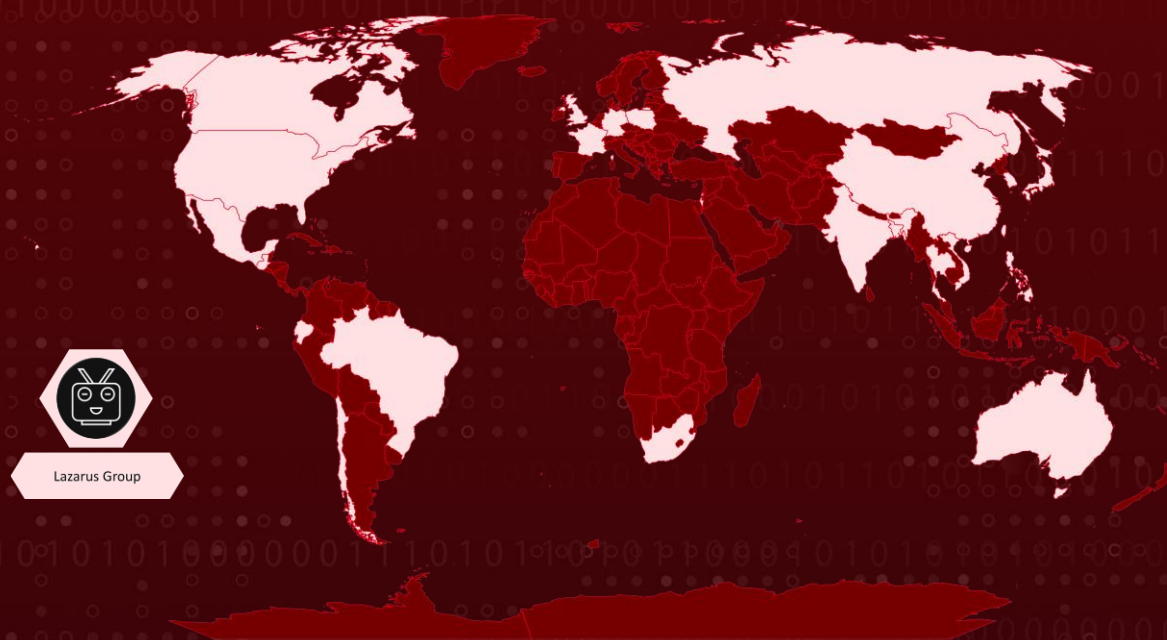

TA Number

TA2022196

Summary

Lazarus, a North Korean threat actor, compromises vulnerable VMware Horizon servers and deploys MagicRAT, a new remote access tool developed by the attackers. MagicRAT creates scheduled tasks on compromised systems to achieve persistence. Additionally, it gives the attacker a remote shell to execute arbitrary commands and manipulate files.

Potential MITRE ATT&CK TTPs

TA0043 Reconnaissance	TA0002 Execution	TA0003 Persistence	TA0004 Privilege Escalation
TA0005 Defense Evasion	TA0011 Command and Control	TA0009 Collection	T1592 Gather Victim Host Information
T1547 Boot or Logon Autostart Execution	T1547.001 Registry Run Keys / Startup Folder	T1025 Data from Removable Media	T1053 Scheduled Task/Job
T1053.005 Scheduled Task	T1036 Masquerading	T1125 Video Capture	T1046 Network Service Discovery
T1027 Obfuscated Files or Information	T1070 Indicator Removal on Host	T1102 Web Service	T1105 Ingress Tool Transfer
T1059 Command and Scripting Interpreter			

Technical Details

#1

MagicRAT is written in the C++ programming language and uses the Qt Framework. Initial stages of MagicRAT execution are designed to identify the system and environment in which the attackers are operating. As soon as MagicRAT is executed, a hardcoded command is executed, creating scheduled tasks on the victim's computer. As soon as the RAT achieves persistence, it contacts the C2.

#2

MagicRAT's C2 servers host two more distinct implants disguised as GIF URLs. Among the GIF files discovered on the MagicRAT C2 is one called "pct.gif," which is an extremely simple port scanner.

#3

The second implant on MagicRAT's C2 is a remote access trojan (RAT) called TigerRAT. In addition to arbitrary command execution, this implant also has file management capabilities.

Actor Detail

NAME	ORIGIN	TARGET LOCATIONS	TARGET INDUSTRIES
Lazarus Group (Labyrinth Chollima, Group 77, Hastati Group, Whois Hacking Team, NewRomanic Cyber Army Team, Zinc, Hidden Cobra, Appleworm, APT-C-26, ATK 3, SectorA01, ITG03)	North Korea	Australia, Bangladesh, Brazil, Canada, Chile, China, Ecuador, France, Germany, Guatemala, Hong Kong, India, Israel, Japan, Mexico, Philippines, Poland, Russia, South Africa, South Korea, Taiwan, Thailand, UK, USA, Vietnam	Aerospace, Defense, Engineering, Financial, Government, Media, Shipping and Logistics, Technology and Cryptocurrencies
	MOTIVE		
	Information theft and espionage, Sabotage and destruction, Financial crime
