**ACTOR
REPORT**

WIP19 targets IT service providers and telcos with custom malware

Date of Publication

October 14, 2022

Admiralty code

A1

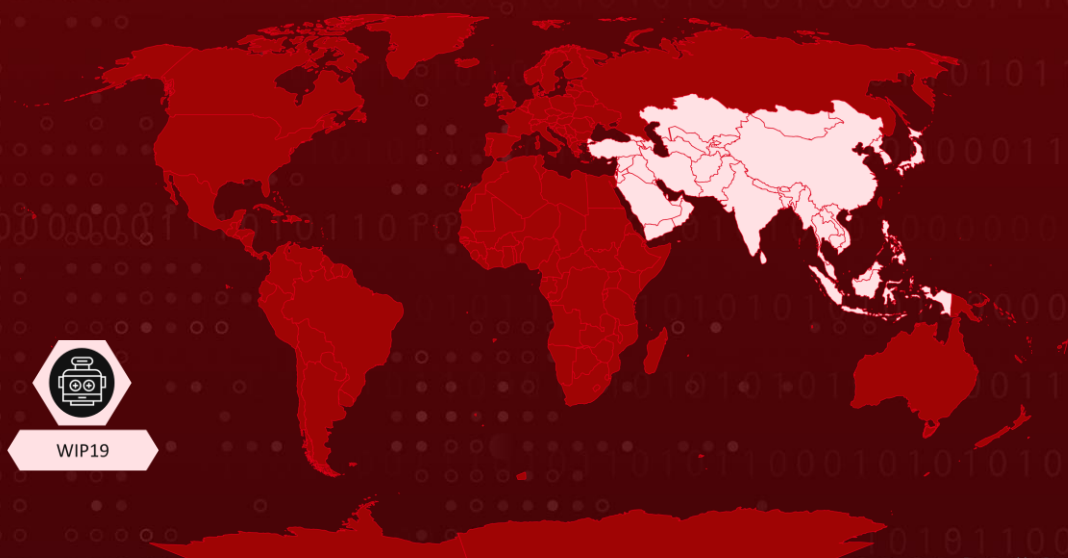

TA Number

TA2022226

Summary

WIP19, a Chinese APT group is using legitimate and stolen certificates to sign malware, such as SQLMaggie, ScreenCap, and a credential dumper which it then used to target telecommunications and IT services organizations in Asia and the Middle East.

Potential MITRE ATT&CK TTPs

TA0001 Initial Access	TA0006 Credential Access	TA0010 Exfiltration	TA0009 Collection
TA0005 Defense Evasion	TA0040 Impact	T1553 Subvert Trust Controls	T1056 Input Capture
T1199 Trusted Relationship	T1490 Inhibit System Recovery	T1070 Indicator Removal on Host	T1574 Hijack Execution Flow
T1041 Exfiltration Over C2 Channel	T1036 Masquerading	T1113 Screen Capture	T1115 Clipboard Data

Technical Details

#1

WIP19 uses a valid certificate that was issued to Korean messaging provider DEEPSOFT Co. and was likely stolen by the threat actor. It then used this stolen certificate to sign all their credential harvesting tools, including a password dumper that loaded an SSP into LSASS and then dumped it.

#2

A keylogger and a screen recorder were also observed being loaded by WIP19 using DLL search order hijacking. ScreenCap malware associated with the APT performs a series of checks that involve the victim's machine name, suggesting that each attack was tailored to a specific victim.
