

THREAT ADVISORY

ATTACK REPORT

A new RansomExx ransomware strain revised in Rust

Date of Publication

November 25, 2022

Admiralty Code

A1

TA Number

TA2022272

Summary

Active since: 2018

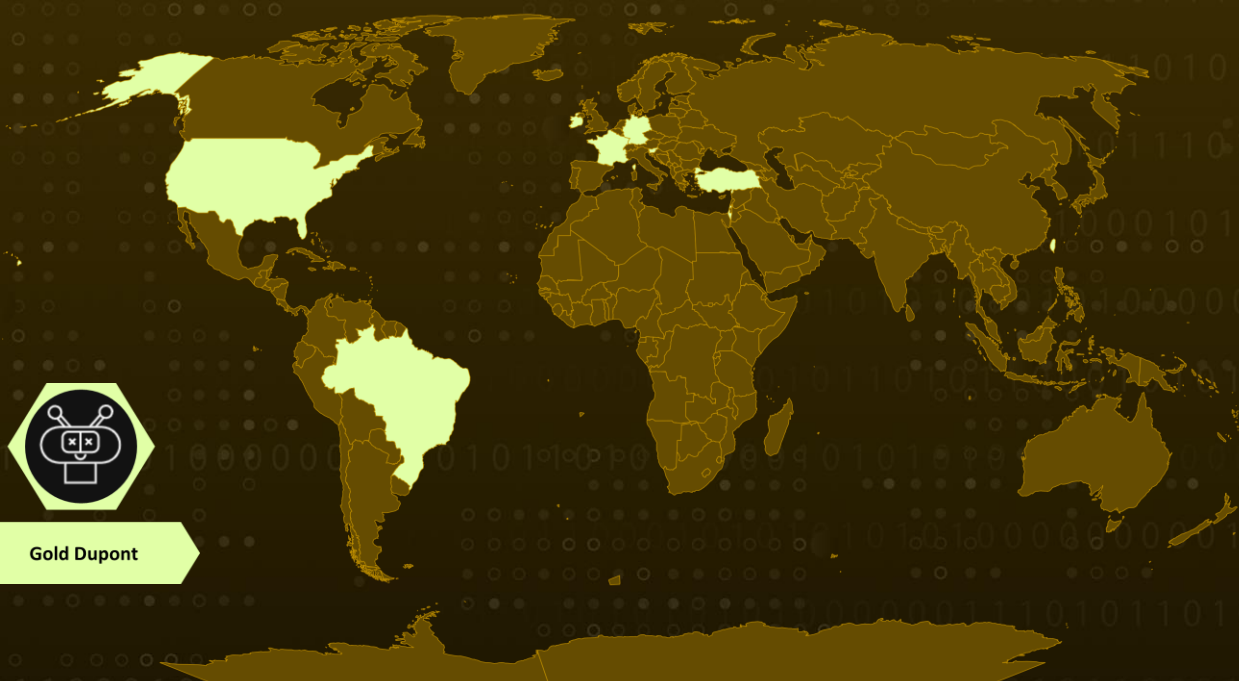

Attack Region: USA, France, Brazil, Taiwan, Germany, Turkey, Slovenia, Israel, Ireland

Targeted Industry: Manufacturing, Education, Banking, Technology, Media, Finance, Healthcare, Government.

Threat Actor: Gold Dupont

Attack: Encrypts files and exfiltrates.

Attack Details

#1

RansomExx is a ransomware variant that operates on a ransomware-as-a-service (RaaS) model and has been active since it first appeared in 2018 as Defray777. The latest version, dubbed RansomExx2 by threat actor Gold Dupont, is primarily intended to work on Linux.

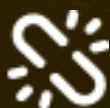

#2

RansomExx2, built in the Rust programming language, has a lower AV detection rate. Following the execution, the ransomware parses over the specified folders, listing and enumerating files with a size greater than or equal to 40 bytes, and encrypting them with the AES-256 algorithm.

#3

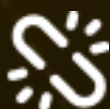

Each encrypted file is assigned a random extension based on a variation of the target name. In each directory where file encryption occurred, a ransom note named "!_WHY FILES ARE ENCRYPTED!.txt" is dumped. Rust's adoption by RansomExx signals that the gang will continue to improve and develop the ransomware while also attempting to avoid being detected.

Recommendations

Security Leaders

Phishing simulations and routine education and awareness training and communications rarely account for MFA fatigue and web browser hygiene. Integrate and communicate all lessons learned.

Security Engineers

- **Uni5 Users:** This is an actionable threat advisory in HivePro Uni5. Prioritize and block all indicators attributed to the threat actors and attacks through your Command Center. Test your controls with Uni5's Breach & Attack Simulation.
- **All Engineers:** Refer to and action upon the 'Potential MITRE ATT&CK TTPs' & 'Indicators of Compromise (IoC)' on the following pages.

Potential MITRE ATT&CK TTPs

<u>TA0001</u> Initial Access	<u>TA0002</u> Execution	<u>TA0005</u> Defense Evasion	<u>TA0007</u> Discovery
<u>TA0040</u> Impact	<u>T1078</u> Valid Accounts	<u>T1059</u> Command and Scripting Interpreter	<u>T1059.004</u> Unix Shell
<u>T1140</u> Deobfuscate/Decode Files or Information	<u>T1562</u> Impair Defenses	<u>T1562.001</u> Disable or Modify Tools	<u>T1082</u> System Information Discovery
<u>T1049</u> System Network Connections Discovery	<u>T1083</u> File and Directory Discovery	<u>T1486</u> Data Encrypted for Impact	<u>T1489</u> Service Stop
