

THREAT ADVISORY

ATTACK REPORT

Rise in new Royal Ransomware attacks

Date of Publication

November 23, 2022

Admiralty Code

A1

TA Number

TA2022270

Summary

First discovered date: Early 2022

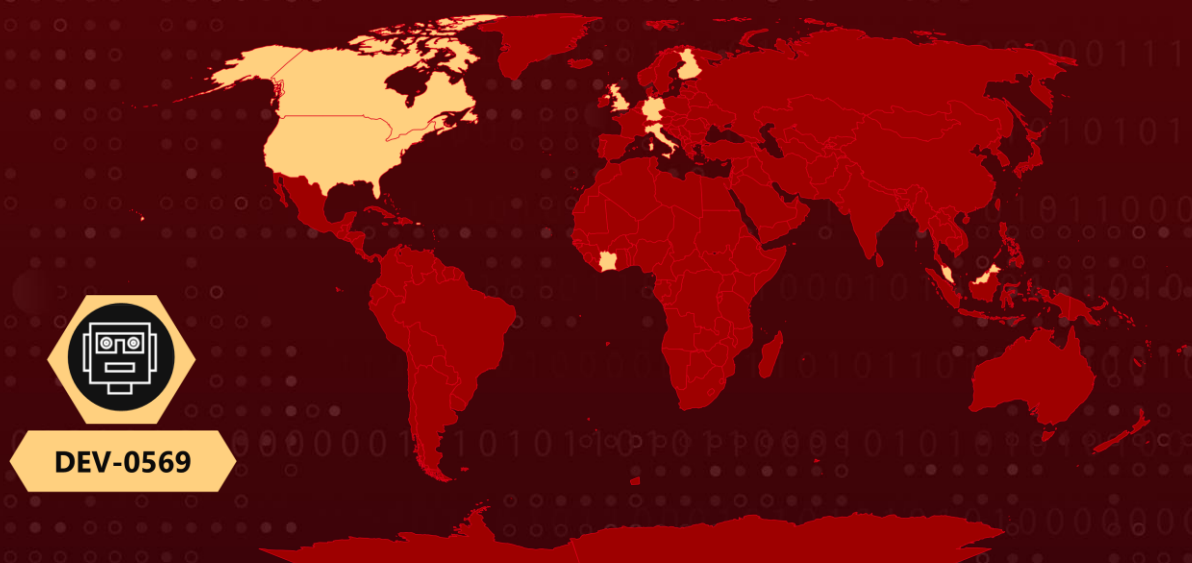

Attack Countries: USA, Canada, Germany, Malaysia, Italy, Ivory Coast, Puerto Rico, Finland, UK

Attack Industries: Electrical, Insurance, Renewable Electricity, Professional Services, Banks, Consumer, Telecommunications, Household Durables, Internet Software & Services, Retail, Diversified Consumer Services

Threat Actor: DEV-0569

Attack: New royal ransomware has affected more than 50 victims

Attack Details

#1

The Royal Ransomware is a new form of ransomware used as a service in early 2022, with the objective of gaining access to a victim's environment, encrypting all their files, and extorting a ransom in order to regain access.

#2

DEV-0569 is the threat actor behind it, and it begins by delivering malicious links to targets through malicious ads, fake forum pages, blog comments, or phishing emails. Using these links, you can access malicious files signed by the attacker as if they were legitimate. A malicious file posing as an installer for Microsoft Teams or Zoom, known as BATLOADER, downloads malware. Upon launch, BATLOADER launches malicious PowerShell activity or runs batch scripts to disable security solutions and deliver various encrypted malware payloads that are decrypted and launched with PowerShell commands.

Recommendations

Security Leaders

Phishing simulations and routine education and awareness training and communications rarely account for MFA fatigue and web browser hygiene. Integrate and communicate all lessons learned.

Security Engineers

- **Uni5 Users:** This is an actionable threat advisory in HivePro Uni5. Prioritize and block all indicators attributed to the threat actors and attacks through your Command Center. Test your controls with Uni5's Breach & Attack Simulation.
- **All Engineers:** Refer to and action upon the 'Potential MITRE ATT&CK TTPs' & 'Indicators of Compromise (IoC)' on the following pages.
