

THREAT ADVISORY

VULNERABILITY REPORT

Google addressed an array of bugs with Chrome 108

Date of Publication

December 2, 2022

Admiralty code

A1

TA Number

TA2022278

Summary

Date: November 29, 2022

Affected Product: Google Chrome

Impact: Evade implemented security controls and gain access to sensitive data

⚙️ CVEs

CVE	NAME	PATCH
CVE-2022-4174	Type Confusion in V8	✓
CVE-2022-4175	Use after free in Camera Capture	✓
CVE-2022-4176	Out of bounds write in Lacros Graphics	✓
CVE-2022-4177	Use after free in Extensions	✓
CVE-2022-4178	Use after free in Mojo	✓
CVE-2022-4181	Use after free in Forms	✓
CVE-2022-4182	Inappropriate implementation in Fenced Frames	✓
CVE-2022-4186	Insufficient validation of untrusted input in Downloads	✓
CVE-2022-4189	Insufficient policy enforcement in DevTools	✓
CVE-2022-4190	Insufficient data validation in Directory	✓

Vulnerability Details

Google Chrome's latest stable channel update for Windows, Mac, and Linux fixes several vulnerabilities.

There are eight high-severity security flaws and 14 medium-severity flaws. The most significant of these flaws is CVE-2022-4174, a type confusion flaw in the web browser's V8 JavaScript engine that, when exploited, allows arbitrary code to be executed on the target device. Lacros Graphics was found to have an out-of-bounds write, while the use-after-free trigger error obtained access to sensitive information. These weaknesses affect Chrome components such as Camera Capture, Extensions Mojo, Audio, and Forms.

Vulnerability

CVE ID	AFFECTED PRODUCTS	AFFECTED CPE	CWE ID
CVE-2022-4174	Google Chrome: 100.0.4896.60 - 107.0.5304.122	cpe:2.3:a:google:googl e_chrome:- :*:*:*:*:*:*	CWE-843
CVE-2022-4175			CWE-416
CVE-2022-4176			CWE-787
CVE-2022-4177			CWE-416
CVE-2022-4178			CWE-416
CVE-2022-4181			CWE-416
CVE-2022-4182			CWE-358
CVE-2022-4186			CWE-20
CVE-2022-4189			CWE-264
CVE-2022-4190			CWE-20

Recommendations

Security Leaders

Phishing simulations and routine education and awareness training and communications rarely account for MFA fatigue and web browser hygiene. Integrate and communicate all lessons learned.

Security Engineers

- **Uni5 Users:** This is an actionable threat advisory in HivePro Uni5. Prioritize the vulnerability, identify the impacted assets, and patch them through your Command Center. Test your controls with Uni5's Breach & Attack Simulation.
- **All Engineers:** Refer to and action upon the 'Patch Details' on the following page.

🌀 Patch Details

Update Google Chrome to version 108.0.5359.71 for Mac/linux and 108.0.5359.71/72 for Windows.
