Actor Details

#1

Russian state-sponsored group Calisto is linked to spoofing Microsoft login pages of Global Ordnance, a legitimate U.S. military weapons and hardware supplier. According to some, the themed domains are likely an attempt to masquerade as authentic parties in social engineering campaigns by the adversary.

#2

As part of these attacks, a malicious PDF was sent to NGO officials using a spoofed email address mimicking a trusted source and a phishing link to evade detection by email gateways.

Recommendations

Security Leaders

Phishing simulations and routine education and awareness training and communications rarely account for MFA fatigue and web browser hygiene. Integrate and communicate all lessons learned.

Security Engineers

- **Uni5 Users:** This is an actionable threat advisory in HivePro Uni5. Prioritize and block all indicators attributed to the threat actor through your Command Center. Test your controls with Uni5’s Breach & Attack Simulation.
- **All Engineers:** Refer to and action upon the ‘Potential MITRE ATT&CK TTPs’ & ‘Indicators of Compromise (IoC)’ on the following pages.
