

Fix What Matters to Your Business

Summary of Vulnerabilities & Threats

7 – 13 November 2022

This week witnessed the discovery of 520 vulnerabilities out of which 21 gained the attention of security researchers worldwide. Among these 21, there were six zero-days and eight other vulnerabilities about which the NVD is still awaiting reanalysis while two were not present in the NVD at all. Hive Pro Threat Research Team has curated a list of 21 CVEs that require immediate action.

This week, we also witnessed attackers disseminate Azov ransomware, a wiper that damages 666 bytes at a stretch.

Further, we also observed a Threat Actor group being highly active in the last week. Earth Longzhi, a Chinese threat actor, popular for Information theft and espionage conducted spear-phishing operations aimed at East and Southeast Asia. Common TTPs which could potentially be exploited by these threat actors or CVEs can be found in the detailed section.

Common MITRE ATT&CK TTPs

TA0043: Reconnaissance	TA0042: Resource Development	TA0001: Initial Access	TA0002: Execution	TA0003: Persistence	TA0004: Privilege Escalation
T1592: Gather Victim Host Information	T1588: Obtain Capabilities	T1190: Exploit Public-Facing Application	T1203: Exploitation for Client Execution	T1547: Boot or Logon Autostart Execution	T1548: Abuse Elevation Control Mechanism
T1589: Gather Victim Identity Information	T1588.006: Vulnerabilities	T1566: Phishing		T1543: Create or Modify System Process	T1547: Boot or Logon Autostart Execution
T1590: Gather Victim Network Information				T1546: Event Triggered Execution	T1543: Create or Modify System Process
				T1574: Hijack Execution Flow	T1546: Event Triggered Execution
				T1556: Modify Authentication Process	T1068: Exploitation for Privilege Escalation
					T1574: Hijack Execution Flow
					T1055: Process Injection

TA0005: Defense Evasion	TA0006: Credential Access	TA0007: Discovery	TA0008: Lateral Movement	TA0009: Collection	TA0011: Command and Control	TA0040: Impact
T1548: Abuse Elevation Control Mechanism	T1110: Brute Force	T1083: File and Directory Discovery	T1210: Exploitation of Remote Services	T1560: Archive Collected Data	T1071: Application Layer Protocol	T1486: Data Encrypted for Impact
T1211: Exploitation for Defense Evasion	T1555: Credentials from Password Stores	T1040: Network Sniffing	T1080: Taint Shared Content		T1573: Encrypted Channel	T1489: Service Stop
T1574: Hijack Execution Flow	T1556: Modify Authentication Process	T1082: System Information Discovery			T1573.002: Asymmetric Cryptography	
T1562: Impair Defenses	T1040: Network Sniffing				T1105: Ingress Tool Transfer	
T1562.001: Disable or Modify Tools	T1003: OS Credential Dumping				T1095: Non-Application Layer Protocol	
T1070: Indicator Removal	T1003.006: DCSync				T1090: Proxy	
T1036: Masquerading	T1003.001: LSASS Memory				T1090.004: Domain Fronting	
T1556: Modify Authentication Process	T1552: Unsecured Credentials				T1090.002: External Proxy	
T1112: Modify Registry					T1090.001: Internal Proxy	
T1027: Obfuscated Files or Information						
T1055: Process Injection
