THREAT ADVISORY

ATTACK REPORT

Trigona Ransomware's Rampant Threat to Businesses

Date of Publication

February 8, 2023

Admiralty Code

A1

TA Number

TA2023069

Summary

First appeared: October 2022

Attack Region: Worldwide

Attack: Trigona has gained momentum lately due to its utilization of the double-extortion technique of encrypting crucial assets within an organization, including endpoints and infrastructure, and demanding payment of ransom, or else the stolen data from these systems will be publicly released on the internet.

Attack Details

#1

The Trigona Ransomware infection vector has not been identified, it is believed to spread through other malware distributed through emails, Remote Desktop Protocol (RDP), and exploiting vulnerabilities. When encrypting files, Trigona will encrypt all files on a device except those in specific folders like the Windows and Program Files folders. Additionally, the ransomware will rename encrypted files to use the `._locked` extension.

#2

The Trigona threat actor offers to decrypt up to three files for free as proof that the affected data can be recovered. They also leave behind a file called "how to decrypt.hta." According to public reports, after accessing the Tor website, victims are instructed to purchase an undisclosed amount of ransom in Monero (XMR) cryptocurrency. The Tor website also features a victim assistance chat option.

Recommendations

Security Leaders

Phishing simulations and routine education and awareness training and communications rarely account for MFA fatigue and web browser hygiene. Integrate and communicate all lessons learned.

Security Engineers

- **Uni5 Users:** This is an actionable threat advisory in HivePro Uni5. Prioritize and block all indicators attributed to the threat actors and attacks through your Command Center. Test your controls with Uni5's Breach & Attack Simulation.
- **All Engineers:** Refer to and action upon the 'Potential MITRE ATT&CK TTPs' & 'Indicators of Compromise (IoC)' on the following pages.

Potential MITRE ATT&CK TTPs

<u>TA0002</u> Execution	<u>TA0003</u> Persistence	<u>TA0004</u> Privilege Escalation	<u>TA0005</u> Defense Evasion
<u>TA0007</u> Discovery	<u>TA0009</u> Collection	<u>TA0011</u> Command and Control	<u>TA0040</u> Impact
<u>T1082</u> System Information Discovery	<u>T1471</u> Data Encrypted for Impact	<u>T1021</u> Remote Services	<u>T1036</u> Masquerading
<u>T1090</u> Proxy	<u>T1114</u> Email Collection	<u>T1497</u> Virtualization/Sandbox Evasion	<u>T1083</u> File and Directory Discovery
<u>T1623</u> Command and Scripting Interpreter	<u>T1631</u> Process Injection	<u>T1532</u> Archive Collected Data	<u>T1471</u> Data Encrypted for Impact

Indicators of Compromise (IOCs)
