Unknown threat groups continues to exploit Log4j in VMware Products

Date of Publication

June 27, 2022

Admiralty code

A1

TA Number

TA2022134

Summary

An unknown APT group is exploiting Log4j vulnerability that is affecting VMware Horizon and Unified Access Gateway (UAG) servers to compromise system and takeover the entire network by deploying malware.

⚙️ CVE

CVE	NAME	PATCH
CVE-2021-44228	Remote Code Execution Vulnerability	

🕸️ Potential MITRE ATT&CK TTPs

TA0001 Initial Access	T1190 Exploit Public-Facing Application	TA0002 Execution	T1059.001 Command and Scripting Interpreter: PowerShell
T1053.005 Scheduled Task/Job: Scheduled Task	T1053 Scheduled Task/Job	T1059 Command and Scripting Interpreter	TA0003 Persistence
T1505 Server Software Component	T1505.003 Server Software Component: Web Shell	TA0005 Defense Evasion	T1036 Masquerading
T1036.004 Masquerading: Masquerade Task or Service	TA0006 Credential Access	TA0008 Lateral Movement	T1021 Remote Services
T1021.001 Remote Services: Remote Desktop Protocol	TA0009 Collection	T1560 Archive Collected Data	T1560.001 Archive Collected Data: Archive via Utility
T1056 Input Capture	T1056.001 Input Capture: Keylogging	TA0011 Command and Control	T1071 Application Layer Protocol
T1090 Proxy	T1071.001 Application Layer Protocol: Web Protocols	T1573 Encrypted Channel	T1573.001 Encrypted Channel: Symmetric Cryptography
T1105 Ingress Tool Transfer	T1571 Non-Standard Port		

Technical Details

#1 Multiple threat actors are targeting organizations that have left Log4Shell unpatched on their public-facing VMware Horizon and Unified Access Gateway (UAG). Through this vulnerability, the attackers obtain access to the victim's network and install a loader malware to enable C2 communication by connecting to their malicious IP address. Eventually, the attackers collect and exfiltrate sensitive information from the victim's network.

#2 Some of the mitigation's organizations can apply:

- Keep systems and devices up to date and patched as soon as fixes are released.
- Organizations that are unable to upgrade to the non-vulnerable versions can refer to the workarounds, see [KB87073](#) and [KB87092](#) provided by the vendor.

Vulnerability Details

CVE ID	AFFECTED PRODUCTS	AFFECTED CPE	CWE ID
CVE-2021-44228	VMWare Horizon 8.x,7.x	cpe:2.3:a:vmware:horizon:*:*:*:*:*:*	CWE-502 CWE-400 CWE-20
	Unified Access Gateway 21.x, 20.x, 3.x	cpe:2.3:a:vmware:unified_access_gateway:*:*:*:*:*:*
