

Vulnerabilities & Threats that Matter

13 June - 19 June 2022

Summary

The first week of June 2022 witnessed the discovery of 798 vulnerabilities out of which 53 gained the attention of Threat Actors and security researchers worldwide. Among these 53, there was one vulnerability available on NVD. Hive Pro Threat Research Team has curated a list of 53 CVEs that require immediate action.

Further, we also observed 1 Threat Actor groups being highly active in the last week. Gallium, a well-known Chinese threat actor group popular for information theft and espionage, was observed targeting telecommunication sectors and non- government organizations. Common TTPs which could potentially be exploited by these threat actors or CVEs can be found in the detailed section.

Published Vulnerabilities	Interesting Vulnerabilities	Active Threat Groups	Targeted Countries	Targeted Industries	ATT&CK TTPs
