**The 8220 Cryptomining Gang massively expands
Cloud Botnets**

Date of Publication

July 21, 2022

Admiralty code

A2

TA Number

TA2022153

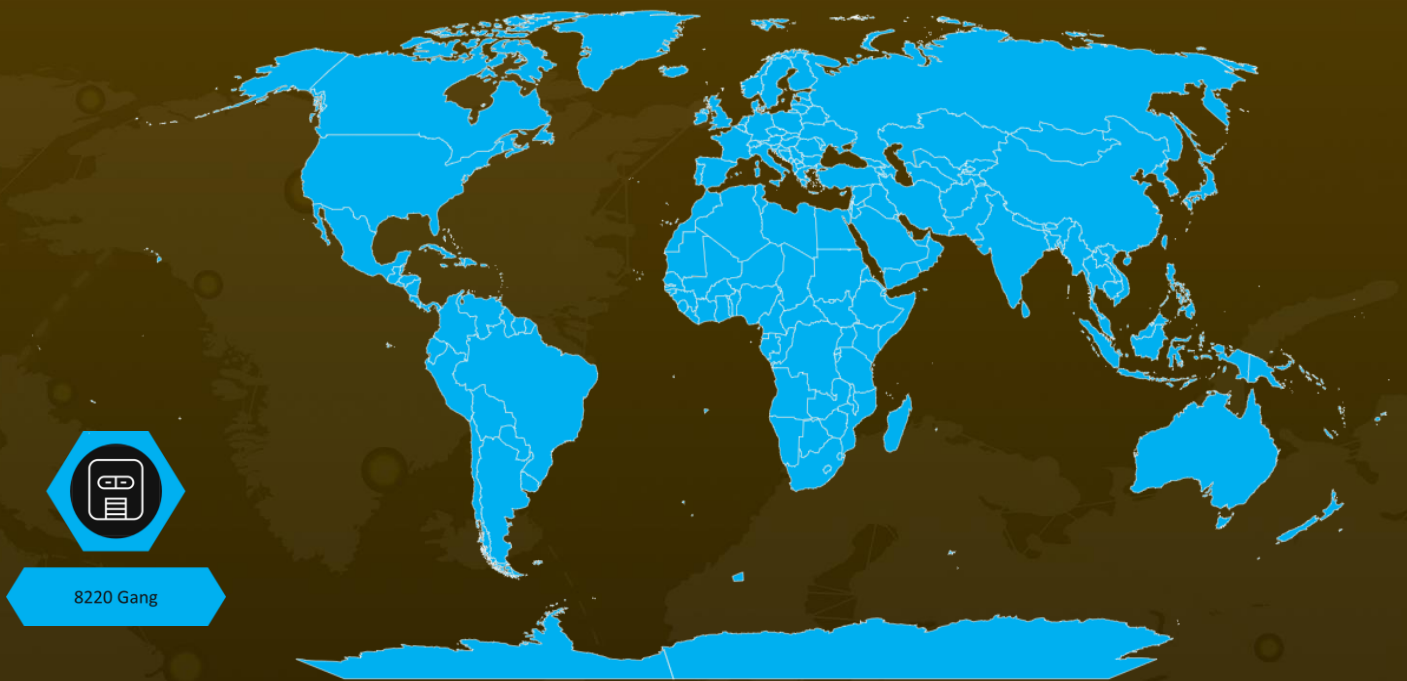

Summary

The 8220 gang has significantly expanded their cloud bot armies around the world, targeting AWS, Azure, GCP, Alitun, and QCloud cloud service hosts. The group is being detected using a new version of the IRC botnet, the PwnRig cryptocurrency miner, and its standard infection script.

⚙️ CVE Table

CVE	NAME	PATCH
CVE-2022-26134	Remote code execution in Atlassian Confluence Server	✓
CVE-2019-2725	Remote code execution in Oracle WebLogic Server	✓

Potential MITRE ATT&CK TTPs

TA0002 Execution	T1059 Command and Scripting Interpreter	TA0003 Persistence	T1505 Server Software Component
TA0043 Reconnaissance	T1592 Gather Victim Host Information	TA0040 Impact	T1496 Resource Hijacking
TA0006 Credential Access	T1110 Brute Force	TA0005 Defense Evasion	T1027 Obfuscated Files or Information

Technical Details

#1

The group's iconic use of port 8220 for command-and-control network connections inspired the name 8220 Gang. Since 2018, the gang has progressed, and in the most current campaign, attacks leverage SSH brute forcing post-infection to automate local and worldwide spreading attempts. Cloud infrastructure victims are frequently attacked via publicly available hosts running Docker, Confluence, Apache WebLogic, and Redis.

#2

The primarily constructed infection script serves as the main code for the botnet's operation. The group recently begun using a separate file Spirit to control the SSH brute force capability outside of the infected script. The Spirit file contains a list of around 450 hardcoded credentials for SSH brute force. The list comprises combinations of the root username and the default passwords of Linux devices and applications.

#3

Another addition to the infection script is the use of block lists to avoid infecting hosts like researcher honeypots. Finally, the PwnRig miner is renowned for its false pool request for government domains, and 8220 gang have recently increased the botnet to approximately 30,000 victims worldwide.
