

Vulnerabilities & Threats that Matter
27 June - 03 July 2022

Summary

The last week of June 2022 witnessed the discovery of 436 vulnerabilities out of which 2 gained the attention of Threat Actors and security researchers worldwide. Hive Pro Threat Research Team has curated a list of 2 CVEs that require immediate action.

Further, we also observed 2 Threat Actor groups being highly active in the last week. Bronze Starlight, a Chinese threat actor group popular for Information theft and espionage, and a ransomware group, Black Basta which has been highly active since April 2022. Common TTPs which could potentially be exploited by these threat actors or CVEs can be found in the detailed section.
