THREAT ADVISORY

ATTACK REPORT

RisePro: A New Threat Emerges on the Russian Online Marketplace

Date of Publication

December 21, 2022

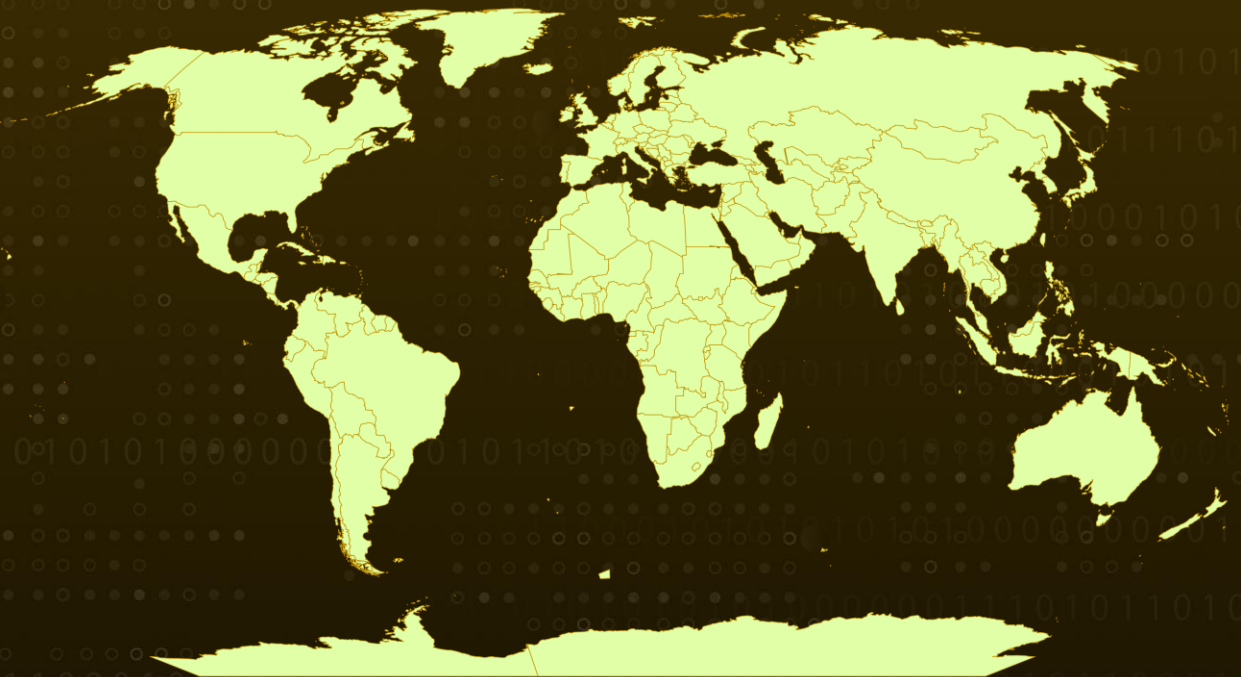

Admiralty Code

A1

TA Number

TA2022308

Attack: RisePro Stealer is been sold at the Russian marketplace as Pay-Per-Install Malware

Attack Details

#1

RisePro is a type of malware that has been designed to steal sensitive information from infected computers and send it back to the attacker. It was first seen being sold on the illegal Russian online marketplace on December 13. The fact that RisePro is being sold on the Russian market may suggest that it is becoming more popular among cybercriminals.

#2

RisePro appears to be based on another malware called Vidar, and it is written in the programming language C++. It targets potentially sensitive information on infected machines and tries to send it back to the attacker in the form of logs. The Russian market has listed over 2,000 logs that were supposedly stolen using RisePro.

Recommendations

Security Leaders

Phishing simulations and routine education and awareness training and communications rarely account for MFA fatigue and web browser hygiene. Integrate and communicate all lessons learned.

Security Engineers

- **Uni5 Users:** This is an actionable threat advisory in HivePro Uni5. Prioritize and block all indicators attributed to the threat actors and attacks through your Command Center. Test your controls with Uni5's Breach & Attack Simulation.
- **All Engineers:** Refer to and action upon the 'Potential MITRE ATT&CK TTPs' & 'Indicators of Compromise (IoC)' on the following pages.

Potential MITRE ATT&CK TTPs

<u>TA0002</u> Execution	<u>TA0005</u> Defense Evasion	<u>TA0007</u> Discovery	<u>TA0006</u> Credential Access
<u>T1204</u> User Execution	<u>T1204.002</u> Malicious File	<u>T1518</u> Software Discovery	<u>T1497</u> Virtualization/Sandbox Evasion
<u>T1082</u> System Information Discovery	<u>T1497.001</u> System Checks	<u>T1016</u> System Network Configuration Discovery	<u>T1012</u> Query Registry
<u>T1555</u> Credentials from Password Stores	<u>T1555.003</u> Credentials from Web Browsers	<u>T1552</u> Unsecured Credentials	<u>T1552.001</u> Credentials In Files
<u>T1539</u> Steal Web Session Cookie			

Indicators of Compromise (IOCs)
