THREAT ADVISORY

**ACTOR REPORT**

**Blind Eagle Hackers resurfaced
with a formidable infection chain**

Date of Publication

January 6, 2023

Admiralty code

A1

TA Number

TA2023009

Summary

First Appearance: 2018

Actor Name: Blind Eagle

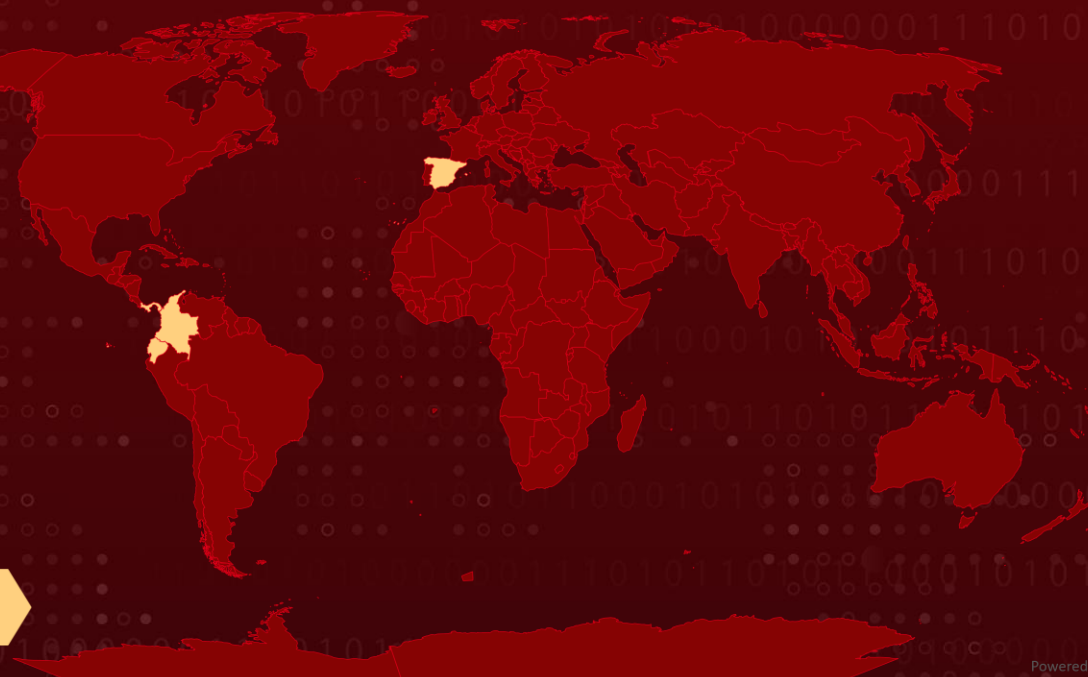

Target Region: Colombia, Ecuador, Panama, Spain.

Target Sectors: Energy, Financial, Government, Healthcare, Manufacturing.

Actor Map

Actor Details

#1

Blind Eagle is a financially motivated threat group that has been targeting individuals in numerous South American countries since at least 2018. A novel infection chain involving a more complex toolkit was discovered in a recent campaign targeting Ecuador-based entities.

#2

Blind Eagle's spear-phishing campaigns involve sending a malicious document or link that, when clicked, deploys a malicious executable inside the LHA. The executable is written in .Net and compressed. When unpacked, it reveals a modified version of QuasarRAT, an open-source trojan designed to access victims' financial accounts. This attack uses a multi-stage method that exploits the genuine mshta.exe binary to execute VBScript contained in an HTML file and download two Python scripts.

NAME	ORIGIN	TARGET REGIONS	TARGET INDUSTRIES
Blind Eagle (APT-C-36)	Colombia	Colombia, Ecuador, Panama, Spain.	Energy, Financial, Government, Healthcare, Manufacturing
	MOTIVE		
	Information theft and espionage		

Recommendations

Security Leaders

Phishing simulations and routine education and awareness training and communications rarely account for MFA fatigue and web browser hygiene. Integrate and communicate all lessons learned.

Security Engineers

- **Uni5 Users:** This is an actionable threat advisory in HivePro Uni5. Prioritize and block all indicators attributed to the threat actor through your Command Center. Test your controls with Uni5's Breach & Attack Simulation.
- **All Engineers:** Refer to and action upon the 'Potential MITRE ATT&CK TTPs' & 'Indicators of Compromise (IoC)' on the following pages.

Potential MITRE ATT&CK TTPs
