THREAT ADVISORY

VULNERABILITY REPORT

Google Chrome Vulnerability Exposes Data of 2.8 Billion Users

Date of Publication

January 18, 2023

Admiralty Code

A1

TA Number

TA2023028

Summary

First Seen: October 2022

Affected Product: Google Chrome

Impact: A remote attacker can gain access to sensitive information

🔧 CVE

CVE	NAME	PATCH
CVE-2022-3656	Insufficient data validation in File System	✓

Vulnerability Details

#1

A vulnerability in Google Chrome could affect over 2.5 billion users. An attacker can exploit this vulnerability for the theft of sensitive files, such as crypto wallets and cloud provider credentials. This vulnerability exists because of how the browser interacts with symlinks in the file system and is caused by improper checking of symlinks pointing to locations that should not be accessible.

#2

An attacker can lure a victim to access a fake website created by them and have the victim download and upload a zip file containing a symlink instead of actual recovery keys, giving the attacker access to sensitive files.

🔧 Vulnerability

CVE ID	AFFECTED PRODUCTS	AFFECTED CPE	CWE ID
CVE-2022-3656	Google Chrome: 70.0.3538.67 - 106.0.5249.119	cpe:2.3:a:google:go ogle_chrome:*:*:* *:*:*:*	CWE-20

Recommendations

Security Leaders

Asset and vulnerability management solutions should be implemented to ensure that all internet-accessible devices are secure, patched, updated, hardened, and monitored. Integrate and communicate all lessons learned.

Security Engineers

- **Uni5 Users:** This is an actionable threat advisory in HivePro Uni5. Prioritize the vulnerability, identify the impacted assets, and patch them through your Command Center. Test your controls with Uni5's Breach & Attack Simulation.
- **All Engineers:** Refer to and action upon the 'Potential MITRE ATT&CK TTPs' & 'Patch Details' on the following pages.

Potential MITRE ATT&CK TTPs

<u>TA0001</u> Initial Access	<u>TA0042</u> Resource Development	<u>TA0008</u> Lateral Movement	<u>TA0006</u> Credential Access
<u>TA0003</u> Persistence	<u>TA0004</u> Privilege Escalation	<u>TA0009</u> Collection	<u>T1210</u> Exploitation of Remote Services
<u>T1547</u> Boot or Logon Autostart Execution	<u>T1547.009</u> Shortcut Modification	<u>T1056</u> Input Capture	<u>T1588</u> Obtain Capabilities
<u>T1588.006</u> Vulnerabilities			

Patch Details

Upgrade to Google Chrome version 109.0.5414.74
