 **ACTOR REPORT**

Kasablanka Group Launches Phishing Campaigns Targeting Russian Government Entities

Date of Publication

January 19, 2023

Admiralty Code

A1

TA Number

TA2023032

Summary

First Appearance: September, 2022

Actor Name: Kasablanka

Target Region: Russia

Target Sector: Government

Actor Map

Actor Details

#1

The Kasablanka group is a cyber-criminal organization that has specifically targeted Russia between September and December 2022, using various payloads delivered through phishing emails containing socially engineered Ink files, zip packages, and executables attached to virtual disk image files.

#2

They used decoy content related to the Republic of Turkey in 2022, Russian import substitution and migration policy in 2015, and Kyrgyzstan's draft Digital Code to evade detection. The group initially employed the commercial Trojan Warzone RAT during early stages of the attack, later switching to Loda RAT.

#3

They also used uncommon file types such as CD-ROM image files and virtual hard disk files to host malicious code in order to evade detection by antivirus software.

	Information theft and Espionage		

Recommendations

Security Leaders

Phishing simulations and routine education and awareness training and communications rarely account for MFA fatigue and web browser hygiene. Integrate and communicate all lessons learned.

Security Engineers

- **Uni5 Users:** This is an actionable threat advisory in HivePro Uni5. Prioritize and block all indicators attributed to the threat actors and attacks through your Command Center. Test your controls with Uni5’s Breach & Attack Simulation.
- **All Engineers:** Refer to and action upon the ‘Potential MITRE ATT&CK TTPs’ & ‘Indicators of Compromise (IoC)’ on the following pages.

Potential MITRE ATT&CK TTPs

<u>TA0002</u> Execution	<u>TA0005</u> Defense Evasion	<u>TA0003</u> Persistence	<u>TA0011</u> Command and Control
<u>TA0008</u> Lateral Movement	<u>TA0001</u> Initial Access	<u>TA0006</u> Credential Access	<u>TA0004</u> Privilege Escalation
<u>T1056</u> Input Capture	<u>T1056.001</u> Keylogging	<u>T1059</u> Command and Scripting Interpreter	<u>T1497</u> Virtualization/Sandbox Evasion
<u>T1113</u> Screen Capture	<u>T1204.002</u> Malicious File	<u>T1204.001</u> Malicious link	<u>T1556</u> Phishing
<u>T1204</u> User Execution	<u>T1555</u> Credentials from Password Stores	<u>T1021</u> Remote Services
