THREAT ADVISORY

ATTACK REPORT

8220 Gang leverages ScrubCrypt in Cryptojacking Attacks

Date of Publication

March 10, 2023

Admiralty Code

A1

TA Number

TA2023128

Summary

First appeared: January 2023

Malware: ScrubCrypt

Threat Actor: 8220 gang (Returned Libra)

Attack Region: Worldwide

Attack: The 8220 Gang leverages ScrubCrypt for crypto-jacking, which is available on HackForums for \$40 per month or up to \$200 for a lifetime.

Attack Details

#1

The 8220 gang has been undertaking crypto-mining operations since 2017. Recently, the gang has begun carrying out crypto-jacking attacks using a new crypter called ScrubCrypt. The assault begins by exploiting unprotected Oracle WebLogic servers in order to download a PowerShell script containing ScrubCrypt.

#2

ScrubCrypt is a crypter that utilizes a distinctive BAT packing mechanism to secure applications. After undergoing Base64 decoding, AES decryption, and unzipping, the regular .NET Reflective Injection code is visible. Before proceeding, the .NET code assesses whether a debugger is attached, updates the extension as null, and verifies the operating system version. Finally, the driver is enumerated in the system to avoid detection by Windows Defender scanning.

#3

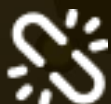

The malware communicates with the same C2 server and downloads two compressed PE files, which initiate crypto mining activity. The 8220 Gang has upgraded to a newer variant of the crypter, ScrubCrypt, which includes evasion and encryption functions to make it more difficult for anti-virus programs to detect their activities.

Recommendations

Security Leaders

Phishing simulations and routine education and awareness training and communications rarely account for MFA fatigue and web browser hygiene. Integrate and communicate all lessons learned.

Security Engineers

- **Uni5 Users:** This is an actionable threat advisory in HivePro Uni5. Prioritize and block all indicators attributed to the threat actors and attacks through your Command Center. Test your controls with Uni5's Breach & Attack Simulation.
- **All Engineers:** Refer to and action upon the 'Potential MITRE ATT&CK TTPs' & 'Indicators of Compromise (IoC)' on the following pages.

Potential MITRE ATT&CK TTPs

<u>TA0002</u> Execution	<u>TA0005</u> Defense Evasion	<u>TA0006</u> Credential Access	<u>TA0007</u> Discovery
<u>TA0009</u> Collection	<u>TA0011</u> Command and Control	<u>T1140</u> Deobfuscate/Decode Files or Information	<u>T1056</u> Input Capture
<u>T1036</u> Masquerading	<u>T1059</u> Command and Scripting Interpreter	<u>T1055</u> Process Injection	<u>T1562</u> Impair Defenses
