THREAT ADVISORY

VULNERABILITY REPORT

Multiple Vulnerabilities Found in Cisco IP Phones Web-Based Management Interface

Date of Publication

March 06, 2023

Admiralty Code

A1

TA Number

TA2023119

Summary

First Seen: March 01, 2023

Affected Product: Cisco IP Phone 6800, 7800, 7900, and 8800 Series Web UI

Impact: Multiple vulnerabilities that may enable a remote attacker without authentication to execute arbitrary code or cause a denial of service (DoS) condition.

CVEs

CVE	NAME	PATCH
CVE-2023-20078	Cisco IP Phone 6800, 7800, and 8800 Series Command Injection Vulnerability	
CVE-2023-20079	Cisco IP Phone 6800, 7800, 7900, and 8800 Series Denial of Service Vulnerability	
CVE-2022-20968*	Remote code execution in Cisco IP Phone 7800 and 8800 Series	

* Represents Zero-day vulnerability

Vulnerability Details

#1

Cisco has disclosed two high-severity vulnerabilities affecting its IP phones, with one causing remote code execution (RCE) and the other enabling denial-of-service (DoS) attacks. Both vulnerabilities stem from insufficient validation of user-supplied input and can be exploited using malicious requests sent to the targeted device's web-based management interface.

#2

The affected devices include Cisco IP Phone 6800, 7800, and 8800 series devices with Multiplatform Firmware, and the Unified IP Conference Phone 8831, Unified IP Conference Phone 8831 with Multiplatform Firmware, and Unified IP Phone 7900 Series. While a patch for the RCE vulnerability is set to be released in January 2023, the company has no plans to release a patch for the DoS vulnerability, which affects devices in end-of-life status.

#3

In December, Cisco made an announcement that it would provide security patches to address a zero-day vulnerability (CVE-2022-20968) that was detected in the Cisco Discovery Protocol (CDP) processing feature of Cisco IP Phones running 7800 and 8800 Series firmware. This vulnerability had public exploit code available.

Vulnerability

CVE ID	AFFECTED PRODUCTS	AFFECTED CPE	CWE ID
CVE-2023-20078	IP Phone 6800, 7800, 8800 Series with Multiplatform Firmware	cpe:2.3:a:cisco_syst ems:ip_phone_seri es:*.~.*.*	CWE-121
CVE-2023-20079	IP Phone 6800, 7800, 8800 Series with Multiplatform Firmware, Unified IP Conference Phone 8831, Unified IP Conference Phone 8831 with Multiplatform Firmware, Unified IP Phone 7900 Series	cpe:2.3:a:cisco_syst ems:ip_phone_seri es:*.~.*.*	CWE-121
CVE-2022-20968	IP Phone 7800 Series: 14.1 - 14.2 Cisco IP Phone 8800 Series: 14.0.1 - 14.2	cpe:2.3:a:cisco_syst ems:ip_phone_780 0_series:14.2:~.*.*.* ~.*.*.*	CWE-787

Recommendations

Security Leaders

Asset and vulnerability management solutions should be implemented to ensure that all internet-accessible devices are secure, patched, updated, hardened, and monitored. Integrate and communicate all lessons learned.

Security Engineers

- **Uni5 Users:** This is an actionable threat advisory in HivePro Uni5. Prioritize the vulnerability, identify the impacted assets, and patch them through your Command Center. Test your controls with Uni5's Breach & Attack Simulation.
- **All Engineers:** Refer to and action upon the 'Potential MITRE ATT&CK TTPs' & 'Patch Details' on the following pages.

Potential MITRE ATT&CK TTPs

<u>TA0042</u> Resource Development	<u>TA0001</u> Initial Access	<u>TA0002</u> Execution	<u>TA0004</u> Privilege Escalation
<u>TA0040</u> Impact	<u>T1059</u> Command and Scripting Interpreter	<u>T1190</u> Exploit Public-Facing Application	<u>T1068</u> Exploitation for Privilege Escalation
<u>T1499</u> Endpoint Denial of Service	<u>T1005</u> Data from Local System	<u>T1588.006</u> Vulnerabilities	<u>T1588</u> Obtain Capabilities
