

Fix What Matters to Your Business

Summary of Vulnerabilities & Threats

5–11 September 2022

The first week of September 2022 witnessed the discovery of 453 vulnerabilities out of which four gained the attention of Threat Actors and security researchers worldwide. Among these four, there was one zero-day. Hive Pro Threat Research Team has curated a list of four CVEs that require immediate action.

This week also witnessed CodeRAT a remote access trojan that targeted Farsi-speaking software developers. In addition, the Dangerous Savanna has been targeting various financial service firms in Africa.

Further, we also observed four Threat Actor groups being highly active in the last week. First was Vice Society, a threat actor group popular for Financial gain, which was observed exploiting two PrintNightmare vulnerabilities to escalate privileges. The second was Worok, a threat actor group, popular for Information theft and espionage, which was spotted targeting governments and high-profile companies in Asia. Third was Lazarus Group a North Korean threat actor group popular for Information theft and espionage, which was observed compromising vulnerable VMware Horizon servers and deploying MagicRAT. The fourth was APT42 an Iranian threat actor group popular for Information theft and espionage, which was observed targeting individuals and organizations in at least 14 countries. Common TTPs which could potentially be exploited by these threat actors or CVEs can be found in the detailed section.

Published Vulnerabilities	Interesting Vulnerabilities	Active Threat Groups	Targeted Countries	Targeted Industries	ATT&CK TTPs

Detailed Report

🔧 Interesting Vulnerabilities

VENDOR	CVE	PATCH DETAILS
	CVE-2022-3075*	Update Google Chrome to version 105.0.5195.102 for Windows, Mac, and Linux Patch Link: https://www.google.com/intl/en/chrome/?standalone=1
	CVE-2021-1675 CVE-2021-34527 CVE-2021-34523	https://msrc.microsoft.com/update-guide/en-US/vulnerability/CVE-2021-1675 https://msrc.microsoft.com/update-guide/en-US/vulnerability/CVE-2021-34527 https://msrc.microsoft.com/update-guide/en-US/vulnerability/CVE-2021-34523

👤 Active Actors

ICON	NAME	ORIGIN	MOTIVE
	Vice Society	Unknown	Financial gain
	Worok	Unknown	Information theft and espionage
	Lazarus Group (Labyrinth Chollima, Group 77, HastatiGroup, WhoisHacking Team, NewRomanicCyber Army Team, Zinc, Hidden Cobra, Appleworm, APT-C-26, ATK 3, SectorA01, ITG03)	North Korea	Information theft and espionage, Sabotage and destruction, Financial crime
	APT 42	Iran	Information theft and espionage
